

Rollfilm Carrier RC40 & RC40M

For the ALOS Z40, Minolta 600Z and Bell+Howell
ABR 2000 Reader-Printers

The ALOS RC40 and RC40M rollfilm carriers allow you to view and print 16mm and 35mm rollfilm with ease. A motorized model (RC40), with a selection of two different speed controls, and a manual version (RC40M) are available. Both models mount easily on the [ALOS Z40](#), Minolta RP600Z and the Bell+Howell ABR2000 Reader-Printers, making it a breeze to switch between roll and fiche formats. Film threading is simple, even for the first time user.

The RC40 features two speed control options. Both options make it quick and simple to locate the desired film location depending on the application or user preference.

Push-button controls feature three convenient speeds. Slow motion, scan and high speed are available for forward and reverse motion. High speed is at 10 feet (3m) per second, and the slow scanning motion is remarkably smooth.

Variable speed control is available for any film speed adjustment between 0 to 10 feet (3m) per second. The desired film speed in both directions is adjusted with a control knob. This control allows hands-free operation and smooth film movement at any speed, which eliminates eye strain.

What ever your preference: smooth and steady film transport is guaranteed – even in slow motion.

The automatic film gate prevents film scratching by opening the glass flats during high-speed film transport.

Specifications for the RC40

Formats Accepted:

16mm rollfilm in open reels

35mm rollfilm in open reels

M-type cartridges (with optional adapter kit)

Film Loading:

Manual

Film Scanning:

Manual vertical adjustment. Motorized horizontal variable speed, operated by either push-button controls or a variable speed control knob. Select one or both of the interchangeable control options.

Film Scanning Speed:
0 to 10 feet (3m) per second

Retrieval:
Motorized

Power Consumption:
24W

Power Source:
DC Voltage from main unit

Safety Approval:
UL Approval

Dimensions:
26 1/2" w x 10" d x 4 1/2" h / (673mm x 254mm x 115m)

Weight:
10 3/4 lbs, (4.9 kg)

Accessories:
16/35mm quick load take up reel (included) M-type cartridge adapter kit (optional)
Extra control: choose push-button controls or a variable speed control knob (optional)

Specifications for the RC40M

Formats Accepted:
16mm rollfilm in open reels
35mm rollfilm in open reels

Film Loading:
Manual

Film Scanning:
Manual vertical and horizontal movement

Film Scanning Speed:
Manual

Retrieval:
Manual

Power Consumption:
N/A

Power Source:
N/A

Safety Approval:
UL Approval

Dimensions:
26 1/2" w x 10" d x 4 1/2" h / (673mm x 254mm x 115m)

Weight:
9 14 lbs, (4.2 kg)

Accessories:
16/35mm quick load take up reel (included)
