The EC400 Simplex Document Rotary Camera is designed for efficiency, versatility and portability. Easily interchangeable sealed film magazines allow this camera to be shared by multiple users or departments. The camera’s optics and adjustable settings provide crisp, clean images on open reel 16mm film. User-friendly operating features include electronic monitoring and self-diagnosis for: automatic film advance, lamp intensity, missing magazine, incorrectly loaded film and lamp burnout. The optional three-level blip indexing and sequential frame numbering feature allow rapid CAR system image/frame retrieval, making the EC400 comparable to many higher priced cameras.
Each frame can be indexed with blips and sequential numbers coded to your filing system. Example: Cabinet, Drawer, Folder.

**CAMERA SPECIFICATIONS**

Max feeding width: 13" (33.5 cm)
Reduction factor: 25X lens films 2600 letter-size or A4 documents per 100' roll of 4 ml. 16mm film, or 5330 letter-size or A4 documents per 215' roll of 2.5 ml. 16mm film (allowing for a 5' leader and trailer)
