Powdercoat Finishes

Russ Bassett paint is a baked powder coat finish of the highest quality.

Powder coated surfaces provide unsurpassed resistance to scratches, chipping, fading and chemicals. In addition to superior durability, epoxy polyester hybrid powdercoat finishes are completely inert and exhibit no off-gassing or chemical leaching, which could harm microfilm, magnetic and optical media, and other valuable archival materials.

Application of powdercoat finishes is a dry process requiring no solvents, and does not generate hazardous waste. Unlike wet painting processes, powdercoating is environmentally friendly.

Textured Finishes

Russ Bassett colors are standard in a textured finish as shown. Textured finishes are great at hiding fingerprints, smudges, dirt and wear, while adding structure, interest and character in the commercial environment.

Custom Colors

Paint colors other than Russ Bassett's standard finishes are also available at an additional charge. For matching purposes, a color sample (preferably on steel) must be submitted with your order. Contact Customer Service for lead times and upcharges on custom colors.

Standard Powdercoat Finishes

The colors and textures represented on this chart are a good representation of the color and texture, and as accurate as this reproduction process allows. For critical matching, however, you may request an actual painted metal sample for your review and approval.
