### **Microfilm Scanner Provides Performance and Value**

The ScanPro1000 utilizes cutting-edge digital technologies to bring you an exceptionally compact microfilm viewer/scanner/printer with a desktop "foot print" the size of two sheets of letter paper. The ScanPro 1000 is easy-to-use and provides powerful features for working with all of your information stored on fiche, microfilm, micro opaques, and ultra fiche.

### **View All the Information Stored on Your Microforms**

The ScanPro1000 features a single zoom lens which means you don't have to stop your look-ups to change lenses. And, the easy-to-use PowerScan™ software provides many standard features like automatic film advance, focus, exposure control, and optical image rotation so you can complete your look-ups and research quickly and efficiently.

### **Easy to View, Scan, Print, and Save to Other Media**

View the information that you have stored on your microforms right on your PC monitor, with live, real-time viewing. When you locate the information that you want, you can complete a high resolution scan in only ONE second with just "a single click".

### **Customizable Toolbar With Save & Recall Settings**

Customize the ScanPro 1000 toolbar and have a reader, a reader printer, a full featured research scanner, or anywhere in between. And, you can save and recall the customized settings with just "a single click".

## The ScanPro 1000 Complete Digital Solution

### Features and Benefits

- Compact, desktop operation, fits almost anywhere.
- High resolution scan of your microfilm in just ONE second.
- Single Zoom lenses cover 7X to 54X or 8X to 100X.
- Real time viewing on any Windows compatible monitor.
- Time saving automatic features such as brightness, contrast, focus, image straightening, and image cropping.
- Use with All Microforms including fiche, ultra fiche, roll film, micro opaques, and aperture cards.
- 360° Optical Image Rotation and Digital Rotation.
- Scan, print, e-mail, save to USB, CD, and hard drive.
- PDF, JPEG, TIFF, TIFF comp., TIFF G4, and Multipage.
- Customizable toolbar for simple operation.
- Save and restore settings provides flexibility and efficiency.
- Secure screen mode for public use applications.
- On screen help for convenience and ease-of-use.

## What people are saying about the ScanPro 1000...

"I am using the ScanPro1000 in my research that utilizes primary sources on microfilm. The ScanPro is simply revolutionary. The zoom lens (7X to 54X) works with all my film types and the magnifier feature lets me see the smallest details on even the oldest of microfilm. And, the ScanPro's compact size means that it can sit next to my computer and scan the information directly to my hard drive. Just beautiful!"

- Diane Lehmann -- Researcher, Northwestern University

"The ScanPro 1000 is a solid, versatile performer for our public library. The software (PowerScan) excels at making it easy for our patrons to quickly and efficiently complete their genealogy and local history look-ups on any of our film types (35mm, 16mm, and fiche). The 'What You See, Is What You Get' feature is simply marvelous. It makes everything so much easier and faster when printing, saving to USB, and CD's. We have tried other equipment and this is the best."

- Ann Marie Harris -- Senior Technician, Berkshire Athenaeum Public Library

## Scan All of Your Microforms

The Microfilm ScanPro 1000 is the perfect viewer/printer/scanner for all of your microforms, Fiche, Roll Film, Micro Opaques, Micro Books, Ultra Fiche, and Aperture Cards.

And, the Microfilm ScanPro 1000 utilizes combination carriers that remain on the ScanPro when changing film types. These carriers are designed to avoid film scratching, built for public use applications, and feature ball bearing guides to provide exceptional film positioning control.

### ScanPro 1000 Product Information

SOFTWARE: *PowerScan™, Auto-Scan™ plug-in (optional).*  
SCANNING RESOLUTION: *Selectable 150, 200, 250, 300, 400, 600.*
