

ALOS UC50

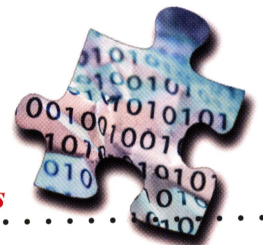

The motorized UC50 is a universal carrier that allows you to meet all of your microform retrieval needs with just one carrier. It is a highly versatile, yet economical carrier that is the ideal choice when fast and easy switching between fiche and rollfilm is required. It is designed to work with a variety of ALOS, Minolta and Bell+Howell reader-printers and microform-scanners.

The unit supports 16mm and 35mm film in open reels, microfiche, aperture cards and jackets. With an optional adapter, 3M-type cartridges are also accepted. The UC50 has a motorized film transport that offers variable motor-driven control, which permits film searching and rewinding at variable speeds, making it quick and simple to locate the desired film location.

The fiche component of the carrier permits viewing of microfiche, jackets and aperture cards. The upper glass opens automatically when the handle is pulled out.

Specifications	UC50
Compatibility:	ALOS Z43, Minolta RP 603Z, 605Z, 606Z, 607Z, MS1000, MS2000, MS3000, MicroSP2000, MicroSP3000, MS6000, MS7000, Bell+Howell ABR 2300, 2400D, 2600, 2700, 2800D, 3000D Reader-Printers/Microform-Scanners
Formats Accepted:	16mm rollfilm in open reels, 35mm rollfilm in open reels, microfiche, aperture cards, jackets and M-type cartridges (with optional adapter kit)
Film Loading:	Manual
Film Scanning:	Manual vertical adjustment Motorized variable speed horizontal control
Scanning Speed:	0 to 10 feet per second
Retrieval:	Motorized
Power Consumption:	24W
Power Source:	DC Voltage from main unit
Dimensions:	20 1/4" w x 12" d x 5 1/4" h (514mm x 304mm x 133mm)
Weight:	13 lbs. (5.9 kg)
Accessories:	16/35mm quick load take up reel (included) M-type cartridge adapter kit (optional)
